## Other Solutions...

Other solutions but I have not tried them.

1. Download DXLoader.exe and run the program  
This is a DX mod loader program which may allow you to load Redsun2020.
2. Create a copy of DeusEx.exe and rename it to Redsun2020.exe.
3. If the game takes you to the vanilla game rather than Redun2020 case.  
Enable Cheats -> Press y or t  
At the bottom of the screen, you was see "say" <- Delete that or backspace  
Type "set human bcheatsenabled true" without the quotes.  
Type "legend" -> this brings up a special Menu  
Click on "load map" and scroll down to 21\_Intro1 <--- doubleclick it

# Thanks!
